Frameless shower enclosure for pentagonal shower trays with pivot door. The fixed panels have 20 mm adjustment each side.

Sintesi is a shower enclosure system that achieves outstanding results by picking up on the current market trend: combining the aesthetic advantage of having no frame with easy assembly, which is achieved thanks to an innovative adjustable system that is truly within everyone's reach. In the "Tiquadro" version, the load-bearing structure and hinges are incorporated into one single square column: the hinge plays a structural role and at the same time heavily influences the system.

TPA TREATMENT PREVENTING LIMESCALE

Vismaravetro uses a innovative technology "TPA" for protecting the glass surfaces of shower enclosures. The glass surface is treated with a polymer which limits the adhesive properties of residues such as limescale, grease and soap deposits. The TPA treatment helps with the cleaning and removal of the lime scale deposits and residues from the glass.
