Sliding bath screen, for bath tubs in recess.

With our usual attention to the next step in bathrooms, Vismaravetro has created a series of shower walls for bathtubs. They are tempered glass panels in various sizes, designed to complete the functionality of bathtubs. The glass panel lets you use the bathtub like a real shower, limiting water spray and leaks while you're having a shower.

The sliding movement of the panels is made by rollers with ball bearings, for a soft and silent action. The ball bearings run inside the top profile. They are hidden from view and well protected from dust and limescale, so to ensure the correct functionality.

TPA TREATMENT PREVENTING LIMESCALE

Vismaravetro uses a innovative technology "TPA" for protecting the glass surfaces of shower enclosures. The glass surface is treated with a polymer which limits the adhesive properties of residues such as limescale, grease and soap deposits. The TPA treatment helps with the cleaning and removal of the lime scale deposits and residues from the glass.
