Shower enclosure for corner shower trays made by a pivot door and fixed panel. The standard height of the complete programme is 195 cm, so to propose Linea as natural complement of the new generation of shower trays, partially or totally built in.

Featuring a pivot shower door system, Linea is an extremely versatile project. Thanks to its reduced size profiles and minimalist design, Linea can be used with countless combinations: recessed, corners, walls, with one or two doors, in-line fixed glass or above a low wall. This truly flexible type can be adapted to any situation. In the In-Out version, just one door helps mark out the wet area and create an area in front of the shower, so you can get dried and dressed at a more comfortable temperature.

TPA TREATMENT PREVENTING LIMESCALE

Vismaravetro uses a innovative technology "TPA" for protecting the glass surfaces of shower enclosures. The glass surface is treated with a polymer which limits the adhesive properties of residues such as limescale, grease and soap deposits. The TPA treatment helps with the cleaning and removal of the lime scale deposits and residues from the glass.
