FOLDING PANELS

PRODUCT WITH CE MARKING

GUIDED MOVEMENT OF THE DOORS

The doors are guided in their movement by a mobile pivot sliding inside the upper profile. A special plastic fuse allows a smooth and silent and precise movement, without the use of lubricants

TPA TREATMENT PREVENTING LIMESCALE

Vismaravetro uses an innovative technology "TPA" for protecting the glass surfaces of shower enclosures. The glass surface is treated with a polymer which limits the adhesive properties of residues such as limescale, grease and soap deposits. The TPA treatment helps with the cleaning and removal of the lime scale deposits and residues from the glass.
