Semi-frameless shower enclosure next to a bath tub or a small wall with one pivot door (180°) with up&down movement and aligned fixed panel, plus small side fixed panel. Door hinged to the aligned fixed panel.

Link is the result of a research aimed at integrating lines and space to the continuity between function and structure. A superior technological evolution, pure expression of the design in its leanest and less permissive definition: less is more, or even better, if there is nothing more to be taken away then there is nothing more to be added.
